In Charge of HSA

DATE _____

8/11/97

~~When no flooding occurs, include miscellaneous river conditions, such as significant rises, record low stages, ice conditions, snow cover, droughts, and hydrologic products issued (WSOM E-41).~~

X No flood stages were reached in this HSA for the month above.

July was a relatively quiet month across the San Angelo HSA, allowing for a recovery from the widespread June flooding. There were a few episodes of afternoon thunderstorms with isolated rainfall totals around one inch, but no flash floods or river floods occurred in July.

San Angelo received 0.74 inches of rain in July, which is 0.32 inches below normal. However, San Angelo remains 5.26 inches above normal for the year, with 16.10 inches. Abilene received 0.28 inches of rainfall for July, 1.81 inches below normal. For the year so far, Abilene has received 16.18 inches of rain, which is 2.81 inches above normal.

Monthly rainfall totals from other areas across the HSA include:

Albany	0.88"	NE Irion Co.	0.22"	Robert Lee	0.10"
Ballinger	0.46"	Lawn	0.74"	Rotan	1.52"
Brownwood	0.07"	Ozona	0.00"	Sterling City	1.91"
Colorado City	0.50"	Paint Rock	1.19"	Telegraph	0.00"

Area reservoir levels at the beginning of August include:

Lake Colorado City	2062.42	Conservation-2070.2
E.V. Spence Res.	1861.31	Conservation-1898.0
O.H. Ivie	1551.08	Conservation-1551.5
O.C. Fisher	1877.43	Conservation-1908.0
Twin Buttes	1915.65	Conservation-1940.2
